Dear Parents and Friends:

It's back to school and back to the three R's. We have had a few meetings to discuss our plan for this year and we are excited about our new projects: 1000 Acts of Green, litterless lunches, energy conservation week at home as well as many more ongoing projects and events to help reduce our waste and raise our awareness.

Litterless Lunch

Last week we collected our garbage, compostables and recyclables for one day and completed a waste audit. The results of our audit showed that at this time each child produces an average of .3 kg of compostables and waste per day.

We hope to reduce this amount by initiating Litterless Lunches. Next week is Waste Reduction Week in Ontario so we thought it would be a good time to begin this task. We have attached a flyer with helpful information to assist you in this task. We will continue to monitor our waste in order to gauge our improvements.

Thanking you in advance for
your help with our projects,

The Eco Maniacs
